Complex Concrete Construction and Remediation

# Company Overview

## 50 years of concrete construction services for the building and civil industries

Ballestrin offers comprehensive concrete construction services to the building and civil industries. Established over 50 years ago, we have extensive project experience across all areas of construction from commercial works through to industrial and mining projects.

With over 70 experienced operators and project management specialists supported with the latest in concrete technologies, Ballestrin can deliver concrete construction and repair projects of all sizes, including small complex works in challenging environments through to monolithic foundation works for large-scale projects.

Ballestrin's team is able to quickly mobilise resources to any location across Australia and complete complex works in short shutdown windows minimising delays to operational plant and facilities.

Ballestrin is a subsidiary company of McMahon Services, a leading Australian privately-owned environmental, infrastructure and building construction and services provider operating across all states and territories. Our close working relationship provides access to their extensive fleet of plant and equipment, personnel resources and office support systems including finance, human resources, information technology, workshops, lay down yards and network of national offices.

## Complex Concrete Structures

Ballestrin provides a full-service solution for the construction of insitu complex concrete structures including ring beams, pile caps, bund walls, ramps, staircases, lift shafts, retaining walls, water retaining structures and bridges. Capabilities include single continuous monolithic pours up to 700m<sup>3</sup>, remote location batching and concrete placement and concrete construction works inside operational facilities.

We build light, medium and heavy-duty pavements up to 60MPa. Other areas of expertise include fibre reinforced concrete, shotcreting, specialist finishes including exposed aggregate and coloured concrete, detailed finishes, concrete sealing and surface densifiers such as Dry Treat.

## Civil Concrete Construction

Ballestrin provides comprehensive civil construction concrete works including kerbing and guttering, pedestrian ramps and footpaths, road crossings, head walls and ground slabs for projects of any size or complexity.

## Concrete Repairs and Remediation

Concrete repairs expertise include epoxy crack injections and coatings, cementitious remediation solutions, concrete spalling repair and halting, replacement of corroded reinforcement, and cathodic protection. We are experienced in the application of SIKA, BASF and Parchem remediation products when required.
